

Bit</>
Code

BitCode is an online platform that allows people to learn how to program web applications and mobile apps in a creative and interactive way.
All features on the learning platform are available in Arabic and free of charge

Tarek is very knowledgeable and experienced in online marketing and loves teaching children. He has good experience in development as well, and is passionate about programming. Tarek believes that coding can change people's lives from shifting the way we think and the way we work to providing endless possibilities.

Tarek is a Robotic Trainer in SCS Syria, and the training kids from ages 9-19 years about robotic, from mechanism side and programming side, and my idea for Startup coming up from that

Mohamed is great developer, you never have to worry about developing platforms with him on the team. He's a passionate entrepreneur and has good experience with two other startups. Mohamed has a 'can do' spirit and is not afraid to take risks.

We noticed many of those around us are becoming more aware in technology, and we see a growing interest in people wanting to get more involved in tech.

We also noticed that there is no Arabic content in tech or to learn programming.

Looking at programming and coding in the Arab world, it is undoubtedly an emerging field that is needed across every industry and every organization in the imminent future.

Responding to this need, BitCode aims to develop the next generation of Arab coders and programmers.

BitCode is an online platform that allows people to learn how to program web application and mobile apps by watching videos and writing code directly into the window provided. This exercise will teach users how to solve challenges and learn coding in Arabic.

Bit-Code.net

The process of writing and developing content.

Currently we're focusing on one topic of coding web development and developing more courses next.

Users watch tutorial videos and write code directly into the browser.

Our platform is totally free and is sustainable with new content provided in Arabic.

We launched the platform in April 2015 with 2 Course, 12 Chapters, 12 Videos, and 53 Challenges.

We have more than 2,350 registered users, without any public marketing.

There were 14,000 coding solutions submitted from users.

We have more than 24,500 Sessions for BitCode with 5 minutes of average session duration of which 22% came from Egypt and 17% from Saudi Arabia.

More than 34,000 minutes was watched from BitCode Videos on YouTube.

There will be 413 million internet users in 2015 in MENA, 28% of them are between ages 15-24 that's 115 million users in our target market.

88% of people said that the internet gave them an important opportunity to learn.

67% of arab have used an online learning platform.

4 of 10 users in MENA purchase something online.

The result of our survey:

- 160 participants
- 59% of them are 15 - 23 years old.
- 95% say they are interested to learning programming.
- 57% say they learn coding and programming form videos online.
- 89% are interested to teach their kids and members of their family how to code.

We plan to sell Pro Courses

We will target about 250,000 users in our first year, and launch the Pro Courses for 9\$ a month, if 2% pay one course that will be 45,000\$ in revenue.

We will host offline workshops to market our platform, or generate revenue from workshop registrations for students, we plan to sell our courses to schools for 200\$ for each student. If we can get 20 students every month we will get 4,000\$

Financials: Projections for 4 years

	Year 1	Year 2	Year 3	Year 4
Total Revenues	0	77,000	308,000	616,000
Pro Courses	0	45,000	180,000	360,000
Offline Courses	0	32,000	128,000	256,000
COGS/Cost of sales	0	15,000	30,000	50,000
Gross Profit	0	62,000	278,000	566,000
Gross Profit Margin	-100%	80%	90%	91%
General and Admin. Expenses	46,750	84,000	147,000	183,000
Salaries	24,000	32,000	45,000	60,000
Website	750	2,000	2,000	3,000
Marketing	6,000	20,000	50,000	50,000
Courses	10,000	10,000	15,000	20,000
Office and other logisti	6,000	20,000	35,000	50,000
Net Profit	N/a	-22,000	131,000	383,000
Net Profit Margin	N/a	-35%	47%	67%

*All of the numbers are in USD

First month:

- Salaries 1000\$
- Domain and hosting 70\$
- Equipment and outsourcing for producing the first 2 courses 5000\$ (HTML/CSS + javascript + PHP)
- Office and other logistic 500\$

Second month:

- Salaries 1000\$
- Hosting 40\$
- Adding 2 courses 0\$ (Jquery + BootStrap)
- Office and other logistic 500\$

Third month:

- Salaries 1000\$
- Hosting 40\$
- Adding 2 courses 1000\$ (PHP + Codeigniter)
- Office and other logistic 500\$

The funding in the first year will be for:

- Equipment and outsourcing for producing of courses 10,000\$ (for 12 courses it total)
- Salaries for 1 founders and 6 employees 24,000\$
- Domain and hosting 1,000\$
- Marketing 6,000\$
- Office and other logistic 6,000\$

Total funding required for the first year is 47,000\$

BitCode is a great product responding to a market need.

We have a big market segment and a first entry advantage.

During the first year, we focus on building the platform and building the content, then we focus on growing the business.
