

Spike

Think big, start small and scale fast

Every business needs artificial intelligence.

But not every business has the capability to build, maintain, and generate value from AI in-house.

► What is Spike?

Spike it's an online platform that makes AI accessible for all businesses, governments and other enterprises.

What Spike provide?

► Easy-to-use online platform that provide all of this service for the customer via a subscription model

1

Data Warehouse

2

**interactive
analytics**

3

**AI and ML to
predict the future**

► Data Warehouse

A data warehouse is a central repository of information and data.

Data flows into a data warehouse from transactional systems, relational databases, and other sources, typically on a regular cadence.

► Interactive Analytics

You can start querying data instantly, get results in seconds and pay only for the queries you run.

And we make it easy to build stunning visualizations and rich dashboards that can be accessed from any browser or mobile device

► AI and ML to predict the future

50% more accurate time-series forecasts with machine learning based on the same technology used at large enterprises with no machine learning experience required. With hours not months.

► All of that with:

- No AI or machine learning experience required.
- No infrastructure need.

With this too:

256-bit military encryption

We ensure you a 100% encryption for your data.

50% more accurate in forecasts

By reducing forecasting time from months to hours.

Messy data?

No problem, our team can help to sort it out.

Simple commercial model

Our subscription models are simple and transparent.

Easily integrate with your systems

For any CRM, ERP or any other tools.

We always here to help

Easy onboarding and ongoing support from our team of experts.

How to use Spike?

With 3 easy steps

1- Import Your Data

Datasets are required to train predictors, which are then used to generate forecasts.
